Faxed as FCC email not receiving
tho frequent trys.

Dear Sirs.

Requesting the Commission... Please allocate a low power frequency to us in Fayette County Tennessee. There is but one radio signal originating from the county and we have been loosing money for years trying to make the 500 watt A M double directional provide service for the growing county of over 30.000. We are in hopes you could see fit to allow 95.5 or someother workable frequency to be allocated. We do request A M preference due to thc expensive cumbersome requirements of the Directional A M we now operate.

Sincerely,

Alfred L. Roberson III
